

Streamline11 API Documentation

POST Emails

<https://gpapi.org/emails>

Endpoint for email verification, subscription to mailing lists. This endpoint could be used for verification purposes. This endpoint does not register your lead as a full lead.

HEADERS

Content-Type - application/x-www-form-urlencoded

BODY urlencoded

email: jonDoe@gmail.com

Lead's email. This value must contain an existing email. This value will be verified against external verification tools. **test@test.com** will not work for example.

first_name: John

Lead's first name. This value may only contain letters. Value must be at least 2 characters.

last_name: Doe

Lead's last name. This value may only contain letters. Value must be at least 2 characters

funnel: testfunnel

This value will depend on the funnel you're using. This can be a self made value, but can be requested as well. Using existing slugs will increase conversion rates. Single word, only lowercase alphanumeric characters allowed.

hitid: tracker_id

Click ID, if you don't provide a click id, one will be generated for you.

POST Leads

<https://gpapi.org/leads>

This endpoint provides a way to post leads. Please review all parameters and their verification rules.

HEADERS

Content-Type - application/x-www-form-urlencoded

BODY urlencoded

first_name: John

Lead's first name. This value may only contain letters. Value must be at least 2 characters.

last_name: Doe

Lead's last name. This value may only contain letters. Value must be at least 2 characters

password: Qbwriu48

Valid password.

Password rules:

- Minimum characters: 6
- Maximum characters: 12
- 1 uppercase character
- 1 lowercase character
- 1 numeric character

email: jonDoe@gmail.com

Lead's email. This value must contain an existing email. This value will be verified against external verification tools. **test@test.com** will not work for example.

funnel: testfunnel

This value will depend on the funnel you will be using. Contact us for the funnel slug you have to use.

source: https://testfunnel.com

This value will depend on the funnel you will be using. Please send the url of the funnel in this parameter.

aff_sub: 1234

This value will depend on the source id in your system.

aff_sub2: this funnel is a test funnel

This value will depend on the funnel you will be using. Please send the description of the funnel in this parameter.

affid: 1234

Your affiliate ID. (Provided by Streamline11)

area_code: +44

Valid country calling code. https://en.wikipedia.org/wiki/List_of_country_calling_codes

phone: 504286660

Valid phone number. The Streamline11 API verifies phone numbers against an external service, so dummy numbers can give errors.

_ip: 1.1.1.1

Optional parameter. Valid IP address. This value overrides the client's IP address. (Client IP address: the one that makes the request, usually this value gets set for server to server communication)

hitid: tracker_id

Click ID, if you don't provide a click id, one will be generated for you.

GET Affiliate Status check

https://gpapi.org/affiliate_deposits/?token=12345&from=2019-07-28&to=2019-08-05&limit=200
